

CROSSIDENTITY
I A M C O N V E R G E D

One Cloud Governance™ (OCG)

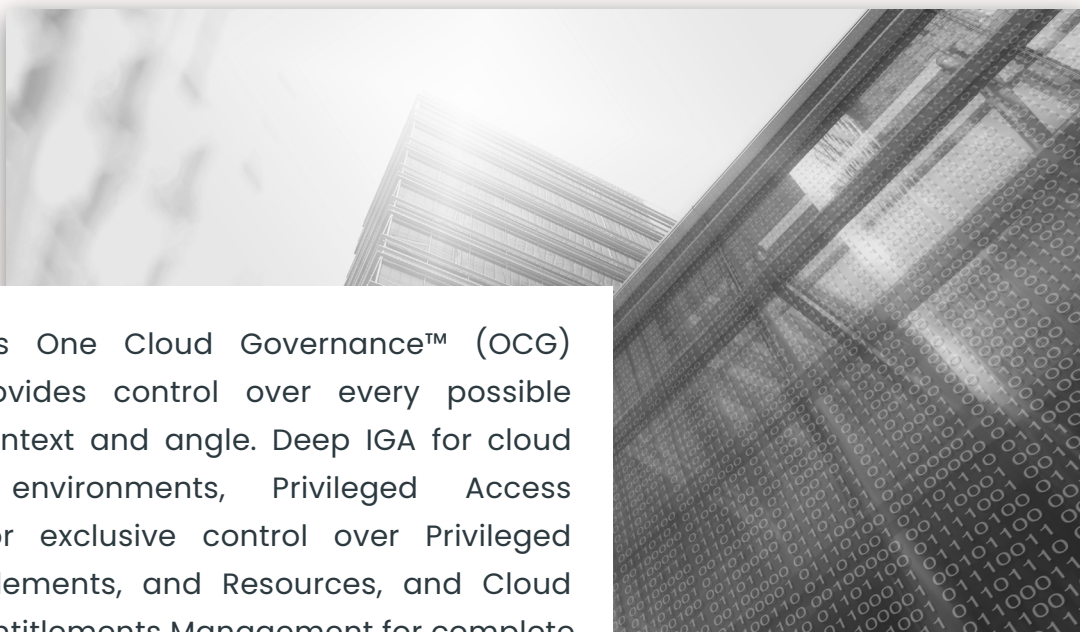

Centrally Govern Identities Across Both Cloud & Hybrid Environments.

Gartner predicts 85% of global organizations will be cloud-first by 2025. And the complexity of managing cloud or hybrid Identities has never been more challenging.

The huge, and constantly increasing boom in the number of Identities organizations must today strictly manage mandates a solution that combines numerous Identity Governance tools into one suite. Identities are no longer limited to humans, they include machines, services, and even APIs.

OCG™ provides a purpose-designed experience to not only hand over the right controls, but also improve the decision-making process through intelligently designed dashboards.

Cross Identity OCG: IGA + PAG + CIEM

Cross Identity's One Cloud Governance™ (OCG) seamlessly provides control over every possible Governance context and angle. Deep IGA for cloud and hybrid environments, Privileged Access Governance for exclusive control over Privileged Accounts, Entitlements, and Resources, and Cloud Infrastructure Entitlements Management for complete visibility and control over Infrastructure-as-a-Service (IaaS) deployments.

- ✓ Achieve Complete Governance Across Cloud or Hybrid Environments
- ✓ Cause Real Results with Our Multiple Ergonomic Contextual Dashboards
- ✓ Granular Control
- ✓ Battle-Tested
- ✓ Cost-Effective

Contextual Dashboarding

Truth is that the effectiveness of a cybersecurity solution goes only as far as the expertise and diligence of the administrators that handle it.

Evolve from dashboards that just provide control sets. Cross Identity's Contextual Dashboarding combines Ergonomic Sciences and our unparalleled experience with Identity & Access Management customers to offer a choice of Contextual Dashboards that not only **enable** admins to do their jobs, but also **empower** them to think correctly and make the right choices.
